RESUME / GAMEPLAY PROGRAMMER

TAN TON

UNITY GAME DEVELOPER FRESHER / INTERN

focus: gameplay & systems

LOC: *Ho Chi Minh City, Vietnam*
EMAIL: *tonthattan116@gmail.com*
GIT: *github.com/Zere1106*
ITCH: *ttt1106.itch.io*

OBJECTIVE 01 // GOAL

IT student pursuing a **Unity Game Developer Intern / Fresher** position. Hands-on experience developing turn-based board mechanics, 3D spatial puzzles, virtual aquarium simulation, and SignalR multiplayer networking. Passionate about writing modular, clean C# gameplay systems.

TECHNICAL SKILLS 02 // STACK

GAME DEVELOPMENT

Unity | C# | Gameplay Programming | Turn-based Loops | 2D/3D Physics | Mobile Touch UI | Creature AI

BACKEND & NETWORKING

SignalR | ASP.NET Core | REST API | SQL Server | JWT Auth

TOOLS & PIPELINE

Git | Blender | VS Code | Android Studio

EDUCATION 03 // EDU

IT College Student

Information Technology College HoChiMinh City

Ho Chi Minh City, Vietnam — 2024 – Present

TARGET ROLES 04 // OPEN

- Game Developer Intern
- Fresher Unity Developer
- Gameplay Systems / Prototyping Intern

FEATURED PROJECTS 05 // WORK

REGNORA — SOLO UNITY GAME DEVELOPER

In Development
Android & PC

TYPE & PLATFORM: Turn-based Board Game & Economy • Android first, PC build available
TECH STACK: Unity | C# | ASP.NET Core | SignalR | SQL Server

- **Turn-Based Board Mechanics:** Built core loop including dice rolls, property acquisition, dynamic rent scaling, and bankruptcy debt settlement.
- **Multiplayer State Sync:** Implemented real-time room/lobby state machine and SignalR synchronization with server-authoritative turn validation.
- **Mobile UI & Feedback:** Built responsive mobile screens (HUD, shop, quests, rewards) with dynamic English/Vietnamese (EN/VI) localization.

TECHNICAL HIGHLIGHTS

DETERMINISTIC TURN STATE MACHINE
RollDice → MovePawn → TileAction → Buy/Upgrade → PayRent → PassTurn.

SERVER-AUTHORITATIVE VALIDATION
SignalR hub verifies dice rolls and property transactions before state commit.

Block Shadow — SOLO UNITY GAME DEVELOPER

Playable on Itch.io
WebGL & PC

TYPE & PLATFORM: Minimalist 3D Spatial Puzzle • WebGL & PC (ttt1106.itch.io/block-shadow)
TECH STACK: Unity | C# | 3D Grid Math | Raycasting | Undo/Redo Stack

- **Spatial Silhouette Projection:** Engineered 3D block placement & raycasting system that matches 2D shadow projections simultaneously on orthogonal walls.
- **Puzzle Architecture & Levels:** Implemented real-time silhouette validation, full Undo/Redo command history stack, orbit camera, and 50+ handcrafted geometric levels.

Cozy Aquarium — SOLO UNITY GAME DEVELOPER

Playable on Itch.io
WebGL & PC

TYPE & PLATFORM: Virtual Aquarium Simulation / Cozy Idle • WebGL & PC (ttt1106.itch.io/cozy-aquarium)
TECH STACK: Unity | C# | State Machine | Particle VFX | Modular UI

- **Autonomous Creature AI:** Programmed distinct swimming, roaming, and idle behaviors for fish species (Goldfish, Betta, Clownfish) and tank cleaning companions.
- **Interactive Cozy Loop:** Implemented food pellet physics, tap-to-pop lucky bubbles, caustic water lighting shaders, ambient audio, and modular tank decor inventory UI.

Zen Stack — SOLO UNITY DEVELOPER

Playable on Itch.io
Android Build

TYPE & PLATFORM: Casual physics-based stacking • Android (ttt1106.itch.io/zen-stack)
TECH STACK: Unity | C# | 2D/3D Physics | Mobile Touch UX

- **Physics & Tactile Feel:** Engineered realistic stone stacking, balance stability thresholds, and responsive single-touch mobile rotation/drop controls.
- **Progression Loop:** Developed an endless stacking loop with altitude-based milestones, local high-score tracking, and calibrated audio feedback.
